

AUSTRIA HANDS-ON DISTRICT HEATING WORKSHOP PRESENTATIONS NOW POSTED

MARCH 10 , 2011

From February 21 to March 4, 2011, a group comprising fourteen BC and 4 New Brunswick delegates from corporations, not-for-profits, and government organizations participated in the Austria Hands-on District Heating Workshop Program, developed by the Canadian Embassy in Vienna and the Provincial Energy Association of Styria. The program involved presentations from Austrian district and community energy stakeholders across the whole value chain, site visits to district heat, combined heat and power, incineration, and biogas plants, as well as participation in the World Sustainable Energy Days Conference Program in Wels.

Sandy Ferguson attended on behalf of BC Bioenergy Network. We are pleased to post these helpful and informative presentations.
