

BCSA Alternative Safety Approaches - Safety Management Plans Client Exemplar Process

The BCSA has recently conducted the Alternative Safety Approaches consultation workshops, the BC Safety Authority is looking to engage one or two clients in the Greenfield Bioenergy Sector in an exemplar process as part of our Alternative Safety Approaches program. Under this program, a client can operate under a Safety Management Plan-an approach that can be presented by a client to replace requirements formulated in regulations or adopted codes. An exemplar client would go through the full process of a Safety Management Plan Application submission with the assistance of BC Safety Authority staff and guidance material. Details on this opportunity can be found **here**:
